Professional Summary

I am a goal oriented User Interface and User Experience Designer(UI/UX) with over two years of experience in web and mobile-App Designs. Capable of creating both efficient and effective User Experience and user interfaces in achieving Business successes. Leading and also collaborating with team of Designers in Developing solution driven Mobile and Web Applications.

Projects

QuikMek Mobile App

September, 2022

- Led design of the application from ideation phase to final mock up of the product.
- Reduced the communication breach and increased trust levels between mechanics and dispatch riders.
- Made it possible and easy for dispatch bikes to be fixed within two hours through on the spot mechanical service.
- Reduced delay in delivery time between dispatch riders to customers.

Wears HUb WebApp

November, 2022

- Created a design system that reduced technical debt for both designers and engineers.
- Created user personas
- Worked with the creative team in defining and implementing solutions for the product brand direction, visuals, and user experience; ultimately designing and implementing multiple B2C web application.
- Developed high level-mock ups
- Minimized third party involvements in ordering customized wears.
- Reduced the cost of customization View case study
