### Professional Summary

A goal oriented User Interface, User Experience Designer(uiux) with over two years of experience in web and mobile-App Designs. Capable of creating both efficient and effective User Experience and user interfaces in achieving Business successes. Leading and also collaborating with team of Designers in Developing solution driven Mobile and Web Applications.

### Projects

#### QuikMek Mobile App

September, 2022

- As a Design team lead, My team and i Made it easier for dispatch riders to have their bikes fixed through Quality on-the spot mechanical service by professionals on any location where their bikes may have broken down.
- I improved delivery time and client to Business relation and as well making it cost efficient for registered users, To get reduced cost on services . It enables seamless delivery and betters customers satisfaction.

#### Wears HUb WebApp

November, 2022

- As a part of a team of Designers, I was fully involved in the User experience and Interface Design.
- I ensured the need for third party involvements in ordering personalized customized wears was no longer necessary.
- Fashionistas/clients are presented the opportunity to order wears and have them customized In-App without having to contact an external body or person to have them customized. With “What you ordered vs what you got” in mind, Wears Hub delivers your product just as you see them online.
- Also with reduced cost of personalized customization by 20 % percent, I made it possible for users to order and personalize their wears with ease. [View Case Study](#)
